- Data sheet for affiliated companies
- Data sheet for service providers
- List with outlets
- Data sheet for vehicles for part load deliveries to end-users
- Data sheet for remote stores
- Data sheet for bagging stations
- An extract of the Official Business Register**

Terms and Conditions for Licensing and Use of the ENplus® Sign

Preface

Bioenergy Europe provides producers, traders, and service providers of wood pellets (hereafter named “applicant”) with a certification system through which they can provide proof of the special quality and the appropriate handling of wood pellets as per the “ENplus® Handbook” (hereinafter named “Handbook”) of the European Pellet Council (hereafter named “EPC”) for countries not managed by any National Licensor/supporter. The Handbook is part of the contract, and in its current version, is published on the ENplus® website: www.enplus-pellets.eu.

The certification scheme is implemented by the EPC, a network within Bioenergy Europe. Hereafter the names EPC and Bioenergy Europe are used synonymously. Through the certification system, applicants can apply for the “ENplus®” certification for the classes “ENplus A1®”, “ENplus A2®” and “ENplus B®”, and after the application is approved, the relevant certification sign (see the Handbook) can be used to identify their products and for marketing purposes.

By signing this application, the applicant acknowledges the terms for the use of the certification sign and the provisions of the current version of the Handbook that determine the relationship between the certificate holder and Bioenergy Europe/EPC. Based on this, the applicant submits an offer to Bioenergy Europe/EPC to enter into a contract for the use of the certification sign. By sending the certificate and the approved and countersigned application form, Bioenergy Europe/EPC accepts the offer and the contract is concluded. The General terms and conditions of the applicant will not be part of the contract.

The information and documentations described in the Handbook must be annexed to the application. Bioenergy Europe/EPC decides on the application as per the provisions of the Handbook, within the established time frame after the complete documentation has been received.

The contract on the use of the certification sign is valid until the end of a three years' certification period. The beginning of the certification period is determined by Bioenergy Europe/EPC. The contract is extended automatically at the beginning of a new certification period. The contract can be cancelled with a three months' notice period at the end of a legal year.

Certification

The applicant acknowledges all duties and obligations established in the Handbook. This includes, among others: the payment of the fee, established in the current version of the schedule of fees for the ENplus® certification scheme; compliance with the provisions of the Handbook; and giving authorisation to Bioenergy Europe/EPC to instruct accredited Testing Bodies with extraordinary inspections, in the cases described in the Handbook, and to impose the sanctions established in the Handbook, including the withdrawal of the right to use the certification sign.

The certification is valid only during the time frame established by this contract. If the contract is extended because a new certification period begins, the applicant receives a new certificate.

Confidentiality and Non-disclosure

Bioenergy Europe/EPC hereby agrees to the non-disclosure of all business-related information received through contact with the applicant in the course of or before certification, if this information is not available elsewhere, if the applicant releases Bioenergy Europe/EPC from its non-disclosure obligation, or if obliged by law to forward this information.

The applicant hereby accepts to treat all documents given by Bioenergy Europe/EPC with confidentiality, if they are not publicly available or intended for publishing.

Obligations of the Applicant

The applicant hereby undertakes to provide all relevant documents and information to Bioenergy Europe/EPC and their contractual partners, as required by the Handbook in the course of the certification process, especially to the accredited Certification Body and accredited Inspection Bodies declared in the Handbook, as well as to provide access to the areas and installations that must be visually inspected in the course of the certification process.

Use of the Certification Seal and the Quality Sign

The individual identification marking (certification seal, quality seal, service sign) assigned by Bioenergy Europe/EPC will be used by the applicant as per the regulations of the Handbook.

Liability

The applicant exempts Bioenergy Europe/EPC from all claims from third parties that are made because of product defects or service deficiency. Bioenergy Europe/EPC is only liable to the applicant – if there is no violation of essential contractual duties or injury to life, limb, or health – only for intent or gross negligence. In case of culpable violation of essential contractual duties that do not rest on intent or gross negligence, liability is limited to the reasonably foreseeable damages typically associated with this contract. Damage claims for contractual termination of the contract, withdrawal, or suspension of the right to use the certification are excluded.

Place of Jurisdiction

The place of jurisdiction is Brussels. The terms are subject to Belgian law.

Final Provisions

Rights and obligations from this contract can only be passed on to a third party upon agreement by the respective contract partners. In the case of a universal succession or a legal succession as per the transformation act, the rights and obligations of the contract are passed without agreement.

Amendments or supplements to this contract are to appear in written form to be valid and must be expressly designated as such.

Your personal data is stored according to Belgian law and is used in automated processes. It is used only to process this contract.
