

Biannual Newsletter

December 2020

Dear <<First Name>>,

Welcome to the year-end edition of the ENplus® newsletter! It is my sincere wish that I find you all well and healthy at the end of this unusual year. 2020 has made us realise that we should always be prepared for challenges and should not stop looking for new opportunities even in moments of doubt and ambiguity.

At the beginning of the pandemic, we felt uneasy to proceed with business as usual, but step by step we found our way in this new reality and adapted to new conditions. Moreover, 2020 brought us two significant milestones for the ENplus® certification scheme.

In June, we surpassed **1000 certified companies**, while last month we celebrated **10 years since the establishment of the scheme**. These achievements would not have been possible without the steady contributions by all parties involved: the ENplus® Head Office, the National Licensers, the National Promoting Associations, the Certification, Inspection and Testing bodies, and last but not least – all the certified

companies which have joined and stayed with the scheme in the past decade.

It is my strong belief that 2021 will bring more achievements for the ENplus® and hopefully, more prosperity for the entire premium pellet market. Now, please have a look at the information below which will present you with the latest news about the certification scheme.

I wish you a happy and peaceful holiday season!

Pablo Rodero
EPC President
