

Monthly Update

June 2024

Dear pellet professionals and subscribers,

Earlier this month, we managed to process the data we collect annually from the certified companies and we can confirm that the certification scheme continues its strong presence in the pellet market. ENplus® has certified **over 13.6 million tonnes of wood pellets in 2023** and **is projected to add almost 1 million tonnes more this year.**

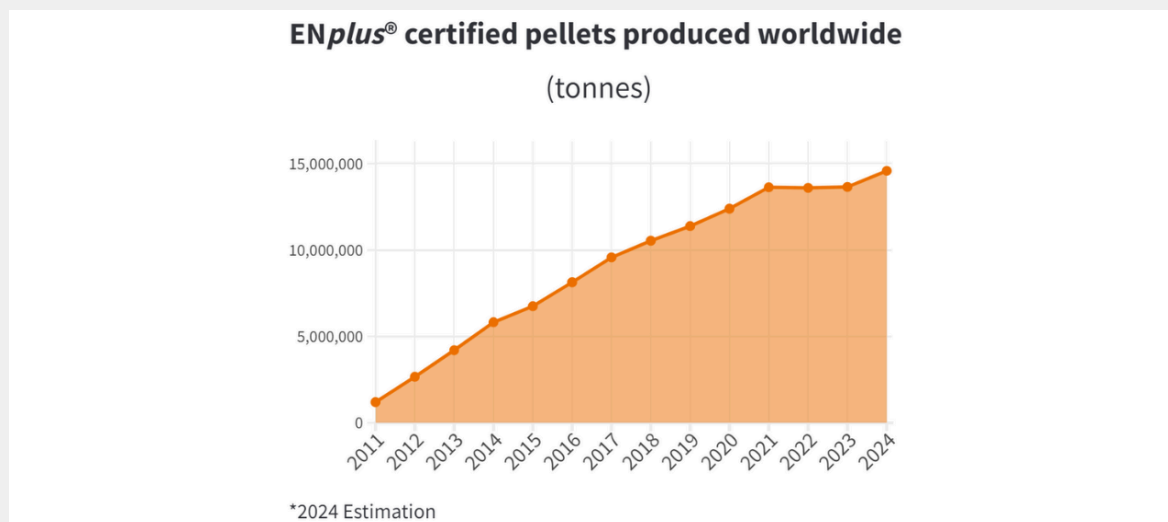

The first half of the year was also very busy for the Fraud Management team whose dedication and persistence led to the achievement of another milestone – the number of fraud cases solved surpassed 1100. **I would like to thank each of you who has reported any fraud attempt** and thus helped us protect the value of the certification.

My gratitude is also to all the certified companies that remained loyal to the scheme over the years, adhering to the stringent quality requirements and delivering excellent products to their customers. You can read about some of these inspirational stories on the ENplus® website as part of the “More Than a Decade with Us” series.

Please have a look below to catch up with all important updates from the past six months. I wish you a relaxing summer holiday season!

Pablo Rodero Masdemont
EPC President

ENplus® statistics

The ENplus® latest statistics are [here](#).

More than a Decade With Us

Our initiative “More Than a Decade With Us” pays special attention to those companies that were among the first to join ENplus® and remained certified over the years. Check the inspirational stories of [Plospan Bio-Energy B.V.](#), [Pirin Pellet EOOD](#), [Energy Pellets d.o.o.](#), and stay tuned for more.

Interviews

Don't miss out the interviews we did this year so far: [Isis Taipe Maldonado from ENplus® Head Office](#) gives advice on how to avoid fraud; [Krunoslav Boban from TÜV NORD Adriatic](#) makes prediction on who will have advantage in the pellet market in the future; [Agnieszka Sadlos from Kostrzewa](#) helps you choose a pellet appliance and [Miguel Zaloña from ENplus® Head Office](#) explains the advantages of the Certification platform for certified companies.

New video

THE WORLD-LEADING CERTIFICATION SCHEME FOR WOOD PELLET QUALITY

Do you know?

Across Europe 2023 saw a significant shift from industrial use of wood pellets towards residential and commercial use. In 2023, the share of residential and commercial consumption reached 59%, the highest in a decade which has been marked by a nearly equal distribution between the two uses. Learn more about the trend in the brand new edition of [Bioenergy Europe's Statistical Report: Pellets 2024](#).

FAQ

After a few months of collecting feedback from partners, applying and certified companies, we have completely revised the FAQ section on our website to answer all questions in relation to the scheme revision, requirements and procedures. [Check it out here.](#)
