

Biannual Update

December 2025

Dear Pellet Professionals and Subscribers,

Welcome to the year-end edition of the ENplus® newsletter!

This year marks the 15th anniversary of the introduction of certification scheme to the wood pellet market. Back in the days, there was no common quality standard and the quality of pellets could vary greatly depending on their origin and supplier.

ENplus® has had a huge impact on the professionalisation of the sector, establishing wood pellets as a true commodity.

As we end the year with our anniversary celebrations, I hope you have seen all the dedicated videos, photos and testimonials that we shared over the past two months. We've come a long way to ensure that high-quality wood pellets now help thousands of European households to heat their homes in an affordable, efficient and climate-friendly way.

On behalf of the ENplus® management team, I would like to express **my gratitude to all our partners and certified companies for making all this possible!**

Please take a look at the content below to catch up on all the important updates from the past six months.

Wishing you a wonderful holiday season!

Pablo Rodero Masdemont
EPC President

Interview

Chris Wiberg, the vice president of [Biomass Energy Lab](#) and a long-term ENplus® partner, shares his reflections on the scheme and the value it continues to bring after being present in the market for over 15 years. Find the [interview here](#).

Fraud management

In the end of 2025, ENplus® remains the certification scheme with the most robust anti-fraud measures in place. We are actively combating fraud and we have achieved **1400 fraud cases solved**. Check out the [trademark protection page](#) to learn more about our efforts.

Consumer Survey

ENplus® is seeking feedback from wood pellet consumers. Please share [the following survey](#) with anyone who uses wood pellets to heat their home to help us gather more information.

Annual figures

In January all certified companies must submit the annual production/trading figures (the actual ones for 2025 and the estimations for 2026). If it is your first year to do so or you would like to be sure how to do it, check out our [tutorial](#) or register for [our dedicated free webinar](#) to take place on 14 January.

European Pellet Forum 2026

The pellet world is preparing for one of the most awaited events of the year: the European Pellet Forum 2026, which will take place in Verona on 27th February 2026, from 9:00 to 13:00, within the official framework of Progetto Fuoco, the most

important global event dedicated to biomass heating. ENplus® will be present with a special corner and a surprise for all the attending pellet consumers. [Learn more about the event here.](#)

15 Years of ENplus®

[Check out the video](#) that will remind you why ENplus® stands out in the wood pellet market.

EUDR

On 4 December 2025, the Council of the EU and the European Parliament reached a provisional political agreement to delay the application of the EU Deforestation Regulation (EUDR). The agreement postpones the compliance date for all operators until 30 December 2026, with an additional six months (until June 2027) for micro and small operators. [Learn more here.](#)

Quality Managers Training

Training events for quality managers of certified companies in 2026 will take place in USA, Croatia, Poland, France and Belgium. More information will be published in the following months [here](#). The quality managers who are located in countries where no on-site training events are planned for 2026 can register for the [e-learning training course](#).

Reminder

The second editions of the ENplus® ST 1001 and ENplus® 1003 standards were published on 1st October 2025. Companies have to adapt to the minor changes introduced with the new versions by the end of 2025. Check out [the documents here](#).

National Support Schemes

Consumers from all over Europe can apply for financial aid when purchasing pellet boilers and stoves to replace old appliances. [Check out this interactive map](#) for more information in the topic.

Market Surveillance Project

The Market Surveillance Project is an initiative aiming at analysing ENplus® certified bags of pellets randomly taken from the market in order to assure compliance with the scheme's standards. The project is part of ENplus® procedures for constant quality control and is open to anyone who wants to submit a sample of certified pellets for analysis. If you are interested in participating, contact us at: enplus@bioenergyeurope.org

Accreditation

The year ENplus® became the only wood pellet quality certification on the market with recognition by the European Cooperation for Accreditation (EA). Find out about it [here](#).

Mobile application

The ENplus® mobile application helps pellet consumers and professionals identify easily certified companies. It also allows you to scan a pellet bag with the camera of your mobile phone and check if it is part of the scheme's database. Download the app for free from [Google Play](#) and [Apple App store](#).

+ 51 CERTIFIED COMPANIES

July-December! The latest certified companies are listed below:

AT 039: TILLY Holzindustire Gesellschaft m.b.H.

GR 003: ISAAKIDIS S.A.
IT 451: Logistica Maceratese Srl
PL 097: Eco Power Plant Sp. z o.o.
PL 395: Anwa Sp. z o.o.

1400

FRAUD CASES SOLVED!
