

BAG DESIGN APPROVAL

MANDATORY ELEMENTS

WOOD PELLETS

The term "wood pellets" has to be translated in all the languages of targeted markets.

CERTIFIED COMPANY CONTACT DETAILS

- The name of the certified company (The bag design owner's name and address)
- The email address / web page of the certified company / bag design owner
- The city name, postal code, full name of the country of the certified company /bag design owner.

DIAMETER & NET WEIGHT

NOTES: "Store in dry conditions" and "Use only in **appropriate** combustion systems according to manufacturer instructions and **legal** regulations."

Both notes have to be translated in all languages of targeted markets.
You can find the translations in translation Guidelines **ENplus® GD 3002**.

QUALITY SEAL

ENplus® quality seal belonging to the bag design owner. The seal on the design has to be the one that has been sent to the customer / certified company.

When using the ENplus® quality seal, an exclusion zone free of graphics, patterns or text around it shall be ensured. The purpose of the exclusion zone is to ensure that the ENplus® quality seal is clearly visible and identifiable. The ENplus® quality seal shall be displayed on a contrasting background. The size of the exclusion zone around the ENplus® quality seal shall be at least the same as the height of the ENplus® ID.

Examples of quality seals

Clearly visible
It will be approved

OPTIONAL ELEMENTS

FUEL PROPERTIES

Should be displayed like the threshold values from **Table 4 ENplus® ST 1001** e.g., moisture : ≤ 10.0 %)

The number of decimals and units of measure, and the signs in front have to be exactly the same as in the **Table 4 ENplus® ST 1001**.

NOTE!: The number of decimals for fuel properties has changed! Please check **Table 4 ENplus® ST 1001**.

RAW MATERIAL

E.g., pine, spruce should be **in line with** the latest conformity report.

DETAILS OF THE NON-CERTIFIED DISTRIBUTOR

The details of the non-certified company should be displayed with the same font size, or smaller font size than the details of the certified company.

TRANSLATION

All the information on the bag design has to be translated in all the languages of targeted markets!

MANDATORY ELEMENT

SERIAL NUMBER

The serial number should reflect the company which bagged the pellets, the site where pellets were bagged, and the date of bagging.

The serial number has to be placed on each bag, after the pellets have been bagged/during the bagging of pellets.

During the bag approval process, the client has to indicate where the serial number will be placed.

NOTE!: Serial number is reflecting the information about bagging and not about production!

Q&A

- Are labels/stickers allowed for representing the serial number?

No, labels are not allowed! It should be impossible to detach the serial number from the bag. It is recommended to use laser printer.

- Does the Head Office provide serial numbers?

No, it's up to the company to codify the required information into serial numbers which can be placed on each bag.
