

Biannual Update

June 2026

Dear Pellet Professionals and Subscribers,

I hope you had a successful heating season and are now looking forward to the next one. I have some exciting news to share with you!

After 15 years of operation, ENplus[®] has reached a significant milestone – more than 14.5 million tonnes of wood pellets have been certified by the scheme in 2025. Preliminary estimates also suggest that the certified volumes for this year could surpass 15 million tonnes.

This serves as a further reassurance that ENplus[®] is now the gold standard for wood pellet quality, endorsed by producers, traders, consumers and appliance manufacturers alike. It is the only wood pellet quality certification scheme recognised by the European Cooperation for Accreditation and has the most active trademark protection on the market, addressing fraud attempts and following up on quality complaints, thus safeguarding the market credibility.

I would like to thank once again all the certified companies for their persistent trust in the certification and dedication to delivering high-quality product to the market.

Please find below a summary of the most significant updates from the past 6 months.
I wish you a relaxing summer holiday season.

Pablo Rodero Masdemont
EPC President

Record Figures

Record year for ENplus[®] as certified pellet production exceeds 14.5 million tonnes in 2025. Learn all about the latest figures [here](#) and check out the [statistics page](#).

More Than A Decade With Us

BIOPEL stands as an example of how a strong commitment to innovation and high quality can drive long-term success in the wood pellet sector. Find out more about the Slovakian company [here](#) and catch up on [more stories](#).

Interview

Paolo Franzan from [AMG S.p.A](#) reveals all the advantages of the Kalor pellet stoves [in this interview](#). More interviews from the past half year are available on [our website](#).

Fraud Management

ENplus[®] continues to be the certification scheme with the most robust anti-fraud measures. Over 1470 fraud cases have been identified and resolved. Meanwhile, we advise companies and end-users to remain [vigilant for scam](#).

Do You Know?

Global wood pellet production reached 53,5 million tonnes, a 10% increase compared with 2024 and the strongest year-on-year growth recorded in recent years. Global pellet consumption also reached a new all-time high of 51,5 million tonnes, confirming the continued relevance of pellets across both industrial applications and small-scale heating. [Learn more here](#).

New Colleagues

In the past few months, we have welcome to the Head Office team **3 new colleagues**: Afonso Pires – Certification Technical Officer, Maryna Ivanova – Certification Assistant and Eva Roos – Certification and Office Operations Assistant.

World Pellet Map 2026

Onca again ENplus® teamed up with Bioenergy International magazine for the preparation of World Pellet Map 2026. The certified companies are highlighted on the map.

Consumer Page

ENplus® has updated the consumer page to help pellet consumers understand the value of the certification when purchasing pellets. Check it out [here](#).

Quality Managers Training

Training events for quality managers are planned to take place in Belgium, Poland, Brazil, Chile and Ukraine later this year. Please follow our [Events page](#) for official announcements and registration details for each event.

13th ENplus® Inspectors' Workshop

Date: 15/09/2026

Location: Brussels, Belgium

The workshop is intended primarily for the inspectors who perform ENplus® inspections of pellet production plants, traders', or service providers' facilities. [Learn more!](#)

European Bioenergy Future (EBF) 2026

Date: 18-19/11/2026

Location: Brussels, Belgium

The European Bioenergy Future (EBF) conference will take place on 18 and 19 November 2026. Save the date!

+ 47 June CERTIFIED COMPANIES
